

Uncontrolled Document

Document Number: E962

Revision: AO

Document Title: PALL GLOBAL DISALLOWED & CONTROLLED SUBSTANCES

Document Type: SUPPLIER DOCUMENTATION

Effective Date: 16th August 2021

Pall wishes to control or limit use of various substances, either in, or in contact with articles and materials used in the manufacture of the products Pall supplies. We therefore request vendors advise Pall if they know of certain substances of interest being present in the item(s) they supply to us.

This document contains the substances of current interest. These lists can change. Therefore, Pall has made available this web site copy of the latest listings. In this way Pall hopes to ensure you are kept informed of our current requirements.

Pall has been specifically requested by suppliers and users to highlight changes made to this web posted document by use of red colored text. To facilitate ease of identification of changes from the previously posted revision.

This web posted document is marked 'uncontrolled' as it is only valid on the day of printing.

A Supplier, by acceptance of a purchase order from a Pall company, acknowledges they have read and understood this latest revision of Pall document number "E962. The Supplier also undertakes to advise Pall if any of the substances referred in this latest revision of E962 are known to be present in the goods they intend to supply in advance of shipment of those goods to Pall and provide Pall with applicable SCIP registration numbers for articles they place on the market in Europe.

I. Application

This document identifies certain substances that Pall, its business units and manufacturing sites (herein referred to as Pall) wish to control or prohibit use of in/or in contact with Pall purchased raw materials, raw materials it specifies for use, components, materials and primary packaging used in the manufacture of products to be supplied to Pall. Thereby enabling Pall to inform its customers and users of the presence of these substances in items supplied by Pall.

II. Scope

- A.** Pall needs to be aware of use of certain substances in the manufacture of their filtration and separation products, parts and accessories. The scope of this requirement is all raw materials, purchased components and parts supplied to Pall. In the event the Supplier undertakes a process employing materials specified by Pall, the Supplier shall undertake a review of the requirements of E962 in respect to any substances or mixtures additionally employed in contact with the specified material or additions to that specified material.
- B.** The Supplier shall certify by completion of a Pall QAO270 form, or provide a written **Declaration of Conformity**, that current and future shipments of the subject component or material meet the requirements of this document, as invoked on the Pall purchase order. This document shall be submitted to the appropriate Pall Manufacturing Site Quality group. In the event of a change to the subject component or material (formulation or manufacturing process) a renewal of this certification / declaration will be required.
- C.** Where an 'article' is to be supplied to Pall contains a substance of concern to Pall at a concentration of greater than 0.1% w/w, the Supplier provide Pall with the applicable European 'Waste Framework Directive' requirements for a SCIP registration number for the part (if the supplier places the item on the market in Europe).
- D.** Unless a concession has been previously granted, it is the Suppliers' responsibility "**not to ship**" and to notify Pall if they have current knowledge, indication, or suspicion, that the supplied component or material may contain a Pall **Disallowed substance(s)** (as defined in Table 2) – wherein failure "not to ship" and to notify is in violation of the Pall Purchase Order and this document, however Pall shall reserve the right to grant concessions once they have been notified.
- E.** It is the Supplier's responsibility to notify Pall if they have current knowledge, indication, or suspicion, that the supplied component or material may contain a Pall **Controlled substance(s)** (as defined in Table 1) wherein failure to notify is in violation of the Pall Purchase Order and this document.

Note: The "**notification of use**" (referred to in paragraphs **II.C.** and **II.D.** above) is limited to Suppliers' in house level of material and process control. This means that "notification of use" is required if the substance is known or suspected by the Supplier to be an ingredient, used in the Suppliers' process, or comes in contact" (including by accidental exposure) with the Pall purchased component.

III. Requirements

A. Pall purchased packaging materials - includes bags, boxes, labels and inserts – require compliance to:

- **CONEG (USA Coalition of North Eastern Governors):** Toxics in Packaging
- **EU directive 94/62/EC** and amendments on packaging and packaging waste.
- EU requirements for registration, evaluation & authorization of chemicals **EU Regulation 1907/2006** (REACH) and its amendments, in respect of any substance listed an SVHC shall be below 0.1% of the material or article supplied unless otherwise specified in Annex XVII of the requirements.
- EU requirement for Restriction of Hazardous Substances in Electronic and Electrical Equipment **EU directive 2011/65/EU** (ROHS2) and its amendments (ROHS3).
- European Commission **Regulation 2019/1021** (POPs) and its amendments, in respect of Persistent Organic Pollutants, including delegated regulation 2020/784 giving a limit of 25ppb for PFOA and its salts, and 1000ppb for PFOA-related compounds.
- European Commission **Directive 2008/98/EC** 'Waste Framework Directive' in respect registration in the ECHA database for articles subject to Substances of Concern in Products (SCIP).

If any of the above requirements are not met, the Supplier must notify the Pall immediately in writing defining the substance and any other available information relative to concentration present.

B. All plastic resins purchased directly by Pall require compliance to:

- **EU requirements for registration, evaluation & authorization of chemicals** EU Regulation 2006/1907 (**REACH**) and its amendments in respect of any substance listed an SVHC shall be below 0.1% of the material or article supplied unless otherwise specified in Annex XVII of the requirements.
- EU requirement for Restriction of Hazardous Substances in Electronic and Electrical Equipment **EU directive 2011/65/EU** (ROHS2) and amendment **2015/863** (ROHS3), in respect of prescribed metals levels and other substances specified in ROHS2 / ROHS3 shall be below the required levels.

Using generally available industrial test methods and/or equipment, residues of metal catalysts from processes used by the Supplier, i.e. in relation to polymerization process, shall be "below detectable limits".

If any of the above requirements are not met, the Supplier must notify the Pall immediately in writing defining the substance and any other available information relative to concentration present.

C. **Animal derived materials** – all components or materials purchased by Pall:

The Supplier is responsible for consulting with their material suppliers to determine if and how animal derived materials are used in the material / article to be supplied to Pall. If the presence of direct materials of animal origin, or animal derived materials, are confirmed the Supplier must notify the Pall Corporation ordering facility in writing. The Supplier must also advise Pall of: animal source (bovine / ovine / caprine / poultry / porcine etc.), how the animal derived material is used, how it is processed to minimize the risk of transmission of TSE (transmissible spongiform encephalopathy) / BSE (bovine spongiform encephalopathy) such as identified by the **U.S. Code of Federal Regulations**, Title 9 of

part 94.18, which sets forth restrictions on the source of products and the CPMP's Note or guidance (**EMEA/410/01**), quantity present (volume %) and its source (animal type, part of the animal and country of origin).

D. Controlled Substances – applicable to all materials provided by the supplier:

If any of the Pall Controlled substances (See Table 1) are known or suspected to be present in the article / materials supplied, are used in the Suppliers' processes, and/or come in contact with during the manufacture of Pall purchased component or material, the Supplier must notify the Pall, in writing defining the substance and any other available information relative to concentration and how the substance is used.

E. Disallowed Substances – applicable to all materials provided by the supplier:

If any of the Pall Disallowed substances (See Table 2) are known or suspected to be present in the article / materials supplied, are used in the Suppliers' processes, and/or come in contact with during the manufacture and subsequent handling of Pall purchased component or material, the Supplier must not ship the material or component unless a concession has been previously granted. Supplier must notify the Pall immediately in writing defining the substance and any other available information relative to concentration and how the substance is used.

F. Conflict Minerals – applicable to all materials provided by the supplier

The United States has enacted the **Dodd-Frank Wall Street Reform and Consumer Protection Act** ('The Act') which imposes certain additional reporting and due diligence requirements on US companies related to 'Conflict Minerals' - particular minerals of concern when originating from the Democratic Republic of Congo, Angola, Burundi, the Central African Republic, Congo, Rwanda, Sudan, Uganda, the United Republic of Tanzania or Zambia.

The minerals of concern are:

Columbite- tantalum (a source of tantalum)

Cassiterite (a source of tin)

Wolframite (a source of tungsten)

Gold

and their derivatives.

Pall requests that the Supplier advises Pall, in writing, if any of the above minerals or their derivatives are present in the material /article to be provided to Pall or are used in the production of that material / article by their supply chain. If so used or present, please conduct a country of origin determination of that mineral and advises Pall if the source indicates it to be a 'Conflict Mineral'.

G. Jatropha Derived Material – applicable materials provided by the vendor

The supplier is responsible for consulting with their materials suppliers to determine if materials derived from Jatropha plant (such as oils, glycerine, or proteins) are used in the materials/article to be supplied to Pall. If the presence of materials derived from Jatropha plant is confirmed, the supplier must notify the appropriate Pall ordering facility in writing.

H. "State of California Environmental Protection Agency 'Office of Environmental Health Hazard Assessment - Safe Drinking Water and Toxic Enforcement Act of 1986'

The State of California, USA has certain labelling and notification requirements relating to chemicals known to the State to cause cancer, birth defects or reproductive harm, which are listed on Prop-65.

If any substance on the current Prop-65 list or its derivatives, are known or suspected to be present in the article / materials supplied, are used in the Suppliers' processes, and/or come in contact with during the manufacture of Pall purchased component or material, the Supplier must notify the Pall, in writing, defining the substance and any other available information relative to concentration and how the substance is used such that Pall may provide 'clear and reasonable' warnings as required by the State of California, USA, of any substance known in that State to cause cancer, birth defects or reproductive harm.

I. GMO and Allergen substances.

If a substance, known to be present in the material or article to be supplied to Pall, is derived from a genetically modified material source (GMO), or from of the following sources – considered potential allergens:

- Celery (root, leaves, stalk, not seeds)
- Cereals containing gluten (i.e. wheat, rye, barley, oats, spelt, kamut or their hybridized strains)
- Crustaceans
- Eggs or egg products (whites, yolks, meringue, mayonnaise, etc.)
- Fish (cod, flounder, salmon, trout, tuna, etc.)
- Lupin
- Milk and milk (dairy) derivatives
- Mollusks
- Mustard
- Peanuts or Peanut products (butter, oil, flour)
- Sesame Seeds
- Soybean or Soy Products (soy derived vegetable protein, tofu, etc.)
- Tree Nuts (including Almond, Brazil, Cashew, Chestnut, Filbert or Hazelnut, Hickory, Macadamia, Pecan, Pine, Pistachio, Queensland or Walnut)
- Sulphur dioxide and sulfites, at concentrations greater than 10 m/kg or 10 mg/l expressed as SO₂.

Or if any GMO or Allergenic substances listed above, are known or suspected to be present in the article / materials supplied, are used in the Suppliers' processes, and/or come in contact with during the manufacture of Pall purchased component or material.

The Supplier must notify Pall, in writing, defining the substance and any other available information relative to concentration and how the substance is used.

NOTES –

'1', Where stated 'and their compounds' please advise any of compounds of this substance known to be present – please do not limit to the examples given. Beryllium or beryllium compounds, Cadmium or cadmium compounds, Hexavalent chromium or hexavalent chromium compounds, Lead or lead compounds, Mercury or mercury compounds.

CONEG (Coalition of Northern Governors) requirements of less than 100 ppm for total incidental cadmium, chromium, lead and mercury.

EU Restriction of Hazardous Substances in Electronic and Electrical Equipment **EU directive 2011/65/EU (ROHS2)** and amendment 2015/863 requirements for concentrations of lead, cadmium, mercury, hexavalent chromium and requirements for polybrominated biphenyls (PBBs) and polybrominated biphenyl ethers (PBDE) and various phthalate substances, must be less than:

Lead limit	0.1% (1000ppm)
Mercury	0.1% (1000ppm)
Hexavalent chromium	0.1% (1000ppm)
Cadmium	0.01% (100ppm)
Polybrominated biphenyls (PBBs)	0.1% (1000ppm)
Polybrominated biphenyl ethers (PBDE)	0.1% (1000ppm)
DEHP	0.1% (1000ppm)
BBP	0.1% (1000ppm)
DBP	0.1% (1000ppm)

DIBP

0.1% (1000ppm)

Batteries limit Cadmium 20ppm and Mercury 5ppm

'2', Reaction mass of 2-ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate and 2-ethylhexyl 10-ethyl-4-[[2-[(2-ethylhexyl)oxy]-2-oxoethyl]thio]-4-octyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate (reaction mass of DOTE and MOTE)

Table 2. Disallowed Substances

A	B	C	D
<p>Aldrin</p> <p>Azo compounds including: Azo dicarbonamide o-amino azo toluene</p> <p>Antistatic agents***</p> <p>4-aminodiphenyl</p> <p>Asbestos and asbestos fibres*</p> <p>Arsenic acid Diarsenic pentoxide Diarsenic trioxide</p> <p>2,2'-dichloro-4,4'-methylenedianiline (MOCA)</p> <p>Anthracene oil Black Pitch</p> <p>3-methoxybutyl acetate</p>	<p>Bis(tributyl tin oxide)</p> <p>Bis(hydroxyphenyl)methane bis(2,3-epoxypropyl) ethers (BFDGE)</p> <p>Benzene, its compounds and polyaromatic hydrocarbons (PAH)</p> <p>Including pentachloro benzene Trichlorobenzene Benzo(k)fluoranthene Benzene-1,2,4-tricarboxylic acid 1,2-anhydride Butyl-4-hydroxybenzoate Benzidine</p> <p>Bis(chlormethyl) ether</p> <p>Beta-naphthylamine</p> <p>2,2H-1,2,3-benzoytiazol-2-yl-4,6-di-tert-butylphenol</p> <p>Benzo[ghi]perylene Benzopyran (HHCB) 1,bromopropane</p> <p>Tetrabromobisphenol A (TBBPA)</p>	<p>Chlordane Chlorinated paraffin Chlordecone</p> <p>Chlorofluorocarbon (CFC)</p> <p>Chromium (VI) trioxide</p> <p>Dichromium (tris) chromate</p> <p>Oligomers of chromic and dichromic acids</p> <p>Ammonium dichromate</p> <p>Potassium dichromate</p> <p>Potassium chromate</p> <p>Potassium hydroxyoctaoxidizincated dichromate</p> <p>Coal tar pitch, high temperature</p>	<p>Dyes: Red 104 Yellow 34</p> <p>Dieldrin</p> <p>Dioxins and congeners including polychlorinated dibenzodioxins (PCDD)</p> <p>1,4-dioxane</p> <p>N,N-ditoly-p-phenyldiamine</p> <p>Dimethyl fumarate (DMF)</p> <p>1,2-Benzenedicarboxylic acid, di-C6-8-branched alkyl esters, C7-rich</p> <p>1,2-Benzenedicarboxylic acid, di-C7-11-branched and linear alkyl esters (DHNUP)</p> <p>1,2-Benzenedicarboxylic acid, dipentylester, branched and linear</p> <p>D-Gluconic acid and its salts D-gluco-Heptonic acid, sodium salt</p> <p>o- and p- dichlorobenzene</p> <p>1-Docosanol</p> <p>Dichloroethane</p> <p>Trans-1,2-dichloroethylene</p> <p>Dichloropropane</p> <p>Decanedioic acid -1,10-dibutyl ester Dechlorane Plus™</p>
<p>E</p> <p>Endocrine disrupting chemicals (EDCs)</p> <p>Endrin</p> <p>Bis(2-methoxyethyl) ether</p> <p>1,2-Dichloroethane (EDC)</p>	<p>F</p> <p>Furans and congeners including polychlorinated dibenzofurans (PCDF)</p> <p>Sulphur hexafluoride</p> <p>Fungicides</p>	<p>H</p> <p>Herbicides</p> <p>Halogenated biphenyl methane compounds Hexabromobiphenyl Hexabromobiphenyl ether Heptabromobiphenyl ether Heptachlor Hexachlorobenzene</p>	<p>I</p> <p>Insecticides including: DDD DDE DDT Endosulfan</p>

<p>1-Eicosanol</p> <p>Ethylene dibromide</p>	<p>Freon 150</p> <p>Formaldehyde, and its oligomeric reaction products with aniline</p> <p>Fluranthene</p>	<p>Hexabromocyclododecane (HBCDD)</p> <p>αhexachlorocyclohexane</p> <p>βhexachlorocyclohexane</p> <p>Highly volatile halogenated hydrocarbons</p> <p>Hydrochlorofluorocarbon (HCFC)</p> <p>Halon 1211</p> <p>Halon 1301</p> <p>2-(2'-hydroxy-3'5'-di-tert-butylphenyl)benzotriazole</p> <p>Hexachlorobuta-1,3-diene</p> <p>1,2 hexanediol</p>	
<p>L</p> <p>Lead chromate</p> <p>Lindane</p>	<p>M</p> <p>Mirex</p> <p>Musk xylene</p> <p>4,4-diaminodiphenyl methane (MDA)</p>	<p>N</p> <p>Novolac glycidyl ethers (NOGE)</p> <p>4-nitrodiphenyl</p> <p>Nonyl phenoethoxylate (NOE)</p>	<p>O</p> <p>Organic tin compounds -</p> <p>Tributyl tin</p> <p>Triphenyl tin</p> <p>Ozone depleting substances**</p> <p>1-Octadecanol</p>
<p>P</p> <p>Pesticides -</p> <p>Including Methoxychlor™</p> <p>Phenanthrene</p> <p>Pyrene</p> <p>Polychlorinated biphenyls (PCBs)</p> <p>Polychlorinated terphenyls (PCTs)</p> <p>Polychlorinated naphthalenes</p> <p>Polychlorinated and polybrominated dioxins & furans</p> <p>PFOS, its salts & PFOS-related compounds</p> <p>PFOSF</p> <p>Perfluorooctanoic acid its salts & PFOA-related compounds</p> <p>Triphenyl phosphate (TPP)</p> <p>Phthalic anhydride(1,3-isobenzofurandione)</p> <p>Propanedioic acid, 1,3-diethyl ester</p> <p>Propanedioic acid, 1,3-dimethyl ester</p>	<p>R</p> <p>Radioactive substances</p> <p>Rodenticides</p>	<p>S</p> <p>Sodium chromate</p> <p>Sodium dichromate, anhydrate</p> <p>Strontium chromate</p> <p>Octamethyl cyclotetrasiloxane (D4)</p> <p>Decamethyl cyclopentasiloxane (D5)</p> <p>Dodecamethyl cyclohexasiloxane (D6)</p> <p>Short chain chlorinated paraffins (SCCPs)</p>	<p>T</p> <p>Toxaphene</p> <p>Thiocyanic acid (2-benzothiazolythiomethylester) (TCMTB)</p> <p>2,4,6-tri-tert-butylphenol</p> <p>Trichloroethylene</p> <p>1,1,2- trichloroethane</p> <p>m-tolyidene diisocyanate</p> <p>2,4-dinitrotoluene</p> <p>Tris(2-chloroethyl) phosphate (TECP)</p> <p>Triton X-100</p> <p>4-(1,1,3,3-tetramethylbutyl) phenol ethoxylated (OPE)</p> <p>4-nonylphenol branched and linear</p> <p>4-nonylphenol branched and linear ethoxylated</p> <p>Terphenyl hydrogenated</p>

<p>Phthalates of the type: Butyl benzyl phthalate (BBP) Dibutyl phthalate (DBP) Diisobutyl phthalate (DIBP) Dioctyl phthalate (DOP) Bis(2-ethylhexyl) phthalate (BEHP) Di-2-ethylhexyl-phthalate (DEHP) Di-iso-nonyl phthalate (DINP) Diisopentylphthalate (DIPP) Bis(2-methoxyethyl) phthalate Dipentyl phthalate (DPP) N-pentyl-isopentylphthalate Dicyclohexyl phthalate 1,1'-oxybis-2-propanol Oxybis-propanol Propanol, 1(or2)-(2-methoxymethylethoxy)-acetate Propanol, [2,(2-butoxymethylethoxy)methylethoxy]- Propanol, [1-methyl-1,2-ethanediyl]bis(oxy)]bis</p>	<p>Y Yellow phosphorus</p>	<p>Z Pentazinc chromate octahydroxide</p>	<p>2,6,10,15,19,23-hexamethyl tetracosane Phenol OTHER: Diisocyanates: 4-methyl-m-phenylene diisocyanate Hexamethylene diisocyanate 2-methyl-m-phenylene diisocyanate 3,3'-dimethylbiphenyl-4,4'-diyl diisocyanate 4,4'-methylenediphenyl diisocyanate 2,4,6-triisopropyl-m-phenylene diisocyanate m-tolylidene diisocyanate 1,3-bis(1-isocyanato-1-methylethyl) benzene 1,5-naphthylene diisocyanate 1,3-bis(isocyanatomethyl)benzene 3-isocyanatomethyl-3,5,5-trimethylcyclohexyl isocyanate 4,4'-methylenedicyclohexyl diisocyanate o-(p-isocyanatobenzyl) phenyl isocyanate 2,2'-methylenediphenyl diisocyanate 2-(2H-benzotriazol-2-yl)-4,6-ditertpentyl phenol (UV-328)</p>
---	--	---	--

NOTES –

***Asbestos / Asbestos fibers** – Material must not contain any asbestos fibers or be in contact with material containing asbestos during processing.

** **Ozone depleting substances** (general) including but not limited to: Polybrominated flame retardants, Polybromobiphenyl (PBBs), Polybromobiphenyl ethers (PBBE), Polychlorobiphenyls (PCBs), Polychloroterphenyls (PCTs)

*** **Antistatic agents** – activated carbon is permitted for use. Please therefore advise Pall of the nature of the antistatic to confirm it is specifically disallowed.
